# How to GitHub

1. Navigate to your git hub folder.

2. Use "git clone https://github.com/rlennon/appcl.git" to clone the files from github.

3. Navigate to appcl folder. "cd appcl"

4. Create your branch. "git checkout -b BranchNameHere"

5. Add files to the appcl folder.

6. "git status"

7. "git add ."

8. "git commit -m "What you've done"

9. "git push origin BranchNameHere"

10. Open your browser and go to github, open your branch and click "New Pull Request".

11. Change the first box to where you want to merge your branch, so it should look like this:

And click create new pull request.

12. There should be a box that looks like this:

Click Merge pull request.

13. Once completed delete the branch you were working on and create a new one each time after the pull
